AND BULLETPROOF author Marcus Hardie takes us into the complications of life and the decisions that not only shape who we are but the impulses that even led us to that point. We read about how his view of faith and a higher power led him in directions that some might not have understood, but were important for him if he was to grow into his own skin and really live. Hardie is able to also take us into war, both the internal struggles that we all combat as well as the external forces that threaten what we hold dear. How does he protect himself in both? By being true to who he is and realizing his own vulnerabilities. For me one of the most powerful aspects of BLACK AND BULLETPROOF is when the author is able to put his own problems and struggles into perspective with the rest of the world. That came through his dealing with Holocaust survivors and understanding what it means to really live in spite of how dark the days might seem. An amazing account of self-reflection, BLACK AND BULLETPROOF stands as a testament of what we can achieve in spite of ourselves. 1 of 1 people found the following review helpful. Standing Strong Under Fire By SEEING GROWTH It is amazing when a person stands strong behind their beliefs, especially when their beliefs are not always popular. Black Bulletproof took me on a journey that started in Long Beach California, ended up in Israel, and ultimately came back to California with a different person from the one who began the journey. I applaud Marcus for sharing his story that involved him finding himself and his meaning. I would recommend that more people read this story and also take similar mental journeys to find out who they want to be along with the path that they are meant to take in life.
