Stephen Hockman : Blackstone's Planning Law Practice before purchasing it in order to gage whether or not it would be worth my time, and all praised Blackstone's Planning Law Practice:

A guide to the principal legal issues relating to planning law. For each case of use it contains all the most commonly referred to planning law statutes, statutory instruments and policy guidance. The work is divided into sections, each dealing with the recognized divisions of planning law and practice, such as the definition of development, the need for planning permission, obtaining permission and enforcement. A further section of the work is dedicated to other materials of a broader environmental nature which impinge regularly on planning practice. Each section is preceded by an introduction, highlighting the principal feature of practice in that area.

About the Author Stephen Hockman, QC, was called to the Bar in 1970 and is a barrister at 6 Pump Court, London.
