Robert Pitofsky : Cases and Materials on Trade Regulation (University Casebook Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Cases and Materials on Trade Regulation (University Casebook Series):

The text is an integrated discussion of the major antitrust guidelines produced by the Department of Justice and the FTC during the 1990s and significant antitrust process issues. The books comparative law materials reflect expanded

antitrust systems of other nations. A series of economic essays and notes prepared in collaboration with economist Steven C. Salop, offer views on antitrust policy development. The casebook offers hypothetical problems throughout as a teaching aid.
