Eleanor M. Fox : Cases and Materials on U.S. Antitrust in Global Context, 2d, 2010 Supplement (American Casebook Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Cases and Materials on U.S. Antitrust in Global Context, 2d, 2010 Supplement (American Casebook Series):

This casebook supplement is, in itself, a compendium of modern antitrust law. It presents or summarizes the ten U.S. Supreme Court antitrust cases decided since *Trinko* in 2004, which span almost all areas of antitrust law from resale

price maintenance and tying to predatory buying, price-squeezing, joint ventures, the single-entity doctrine, extraterritorial jurisdiction, and the antitrust/regulation interface. As well, it presents contemporary merger and monopoly analysis, merger guideline revisions, the FTC's revitalization of its unfairness jurisdiction, and challenges to reverse payment pharmaceutical settlements, and it contains sufficient substantive excerpts from the European Microsoft case to allow an appreciation of the US/EU fault lines.
