**Sbastien Grammond : Identity Captured by Law: Membership in Canada's Indigenous Peoples and Linguistic Minorities** before purchasing it in order to gage whether or not it would be worth my time, and all praised Identity Captured by Law: Membership in Canada's Indigenous Peoples and Linguistic Minorities:

Here, Grammond explains how minority rights make identity legally relevant. He provides a detailed account of struggles that have been fought concerning Indian status and admission to minority-language schools.

"Although its focus is Canadian, *Identity Captured by Law* will have international appeal, both because of its impressive engagement with international as well as domestic law and because indigenous membership and minority language education in Canada are often topics of scholarship about liberalism and its limits." Patrick Macklem, University of Toronto  
About the Author  
Sbastien Grammond is professor of law, University of Ottawa, and the author of *Amnager la coexistence: les peuples autochtones et le droit canadien*, an award-winning treatise on Native law.
