**ExecVisa : Immigration Charity E-book** before purchasing it in order to gage whether or not it would be worth my time, and all praised Immigration Charity E-book:

0 of 0 people found the following review helpful. Immigration Legal Clinics made easyBy SRI was really impressed with this book. I didn't realize how easy it was to start your own legal clinic - I always thought it would be a very bureaucratic process. It saved us a lot of time and effort in trying to figure out what we thought would be a very complicated process to get accreditation from the United States Board of Immigration and Appeals. This mini-book is

an excellent guide and now we know exactly what is involved in providing free and low-cost immigration legal services to immigrants in America. It made such a complicated and daunting process so much easier that, even a charity's board of directors (whose members are usually appointed for reasons other than how well they can follow application/government policy requirements) could move forward in establishing the immigration legal clinic as part of core services for the organization. I wished I had this available to us when we established years ago in Washington, D.C. - in a different organization than this - legal services for poor immigrants.

This is an invaluable guide for social entrepreneurs and non-profit religious, charitable, social service, or similar organizations. It is specifically written for those who wish to start and/or operate an immigration-law non-profit in USA. This guide is devised by ExecVisa.com The year 2015 has witnessed the biggest immigration crisis since the Second World War. More US based social entrepreneurs and non-profit religious, charitable, social service, or similar organizations are starting an immigration law program. However, many struggle to understand the process of starting this pro bono/free and/or low-cost, nominal fee, legal service.
