Kerala (Dislocations):

In Kerala, political activists with a background in Communism are now instead asserting political demands on the basis of indigenous identity. Why did a notion of indigenous belonging come to replace the discourse of class in subaltern struggles? *Indigenist Mobilization* answers this question through a detailed ethnographic study of the dynamics between the Communist party and indigenist activists, and the subtle ways in which global capitalist restructuring leads to a resonance of indigenist visions in the changing everyday working lives of subaltern groups in Kerala.

"This is a wonderfully written piece that will raise some eyebrows and generate some wonderful debates. The critique of indigenist "identity" politics has been sorely needed for a long time, and this work helps us assess that context in a more robust and critical fashion without falling into a lackluster, celebratory mode of championing indigenous politics on a pure level of 'identity' and 'rights'." Ananthakrishnan Aiyer, University of Michigan "A summation of outstanding research, and based on ethical, committed, and egalitarian fieldwork, this book has an enormously important contribution to make to a number of fields, including South Asian Politics, Ethnography and History, Social Movement Analysis, International Studies and Environmental Studies." Kavita Philip, UC Irvine
