Rdiger Wolfrum : International Economic Law: The Max Planck Encyclopedia of Public International Law (Thematic) before purchasing it in order to gage whether or not it would be worth my time, and all praised International Economic Law: The Max Planck Encyclopedia of Public International Law (Thematic):

This volume brings together articles on international trade and investment from the Max Planck Encyclopedia of Public International Law, the definitive reference work on international law. It provides an invaluable resource for scholars, students, and practitioners of international economic law, giving an accessible, thorough overview of all aspects of the field. Each article contains cross-references to related articles, and includes a carefully selected bibliography of the most important writings and primary materials as a guide to further reading. The Encyclopedia can be used by a wide range of readers. Experienced scholars and practitioners will find a wealth of information on areas that they do not already know well as well as in-depth treatments on every aspect of their specialist topics. Articles can also be set as readings for students on taught courses.

from previous edition: "I was very impressed by MPEPIL. I will certainly refer my students" --Professor Brice Dickson, Professor of International and Comparative Law and Director of the Human Rights Centre, School of Law, University of Belfast "The final component for public international law research is commentary. This component is the hardest to acquire electronically. Westlaw, LexisNexis, and HeinOnline offer databases of law review articles, but serious researchers will also demand treatises--classics of international law, and current monographs. The key building block here is the newly available database, Max Planck Encyclopedia of Public International Law, from Oxford University Press. No PIL collection could attain respectability without this work." --Mary Rumsey, Foreign, Comparative and International Law Librarian, University of Minnesota Law Library "MPEPIL is already a valuable research and reference tool. A subscription to this database should be considered by all academic law libraries." --Marcia Hoffman, Associate Director and International and Foreign Law Librarian, University of California, Berkeley School of Law "The resource has a wide coverage, including economic, humanitarian, environmental, and other aspects of international law, it will be a valuable addition to the existing databases and could be used across the law school" --University of Liverpool E-Resources News and Trials "Whether you need to understand an international legal concept or theory or have a specific question about the importance of a particular case or the context of an event, the Encyclopedia of Public International Law online will prove to be an invaluable first stop for your international law research." --Seattle University Law Library Blog "MPEPIL online edition appears as a very useful tool for users wishing to gain general knowledge on a specific topic or as a starting point for researching the doctrine and case law on a specific issue" --Florian Dupuy, ASA Bulletin "It is a fantastic resource." --Jan Glazewski, Professor in the Institute of Marine and Environmental Law, University of Cape Town "This monumental resource will be useful for scholarly researchers and practitioners in the area of public and international law. Academic libraries and corporate law libraries should consider adding it to their digital collections" --Shannon Graff Hysell, American Reference Books Annual About the Author Frauke Lachenmann, Senior Research Fellow, Max Planck Foundation for International Peace and the Rule of Law and Rüdiger Wolfrum, Former Director, Max Planck Institute for Comparative Public Law and International Law Dr. Frauke Lachenmann is Senior Research Fellow, Max Planck Foundation for International Peace and the Rule of Law Rüdiger Wolfrum is Managing Director of the Max-Planck Institute for International Peace and the Rule of Law, the former Director of the Max-Planck Institute for International and Comparative Public Law, and a Judge at the International Tribunal for the Law of the Sea.
