**From Kluwer Law International : International Encyclopaedia of Laws: Transport Law** before purchasing it in order to gauge whether or not it would be worth my time, and all praised International Encyclopaedia of Laws: Transport Law:

The national monographs in this subset of the International Encyclopaedia of Laws deal with transport law in its broadest sense: jurisdiction, state immunity, and the main sources of transport law. With reference to maritime law, the reader will find information on the legal status of the vessel, its acquisition, ownership and registration. Other topics discussed are maritime liens and mortgages, the position of master and crew, liability and limitation of liability

(L.L.M.C. Convention 1976), charter parties and Transport under Bill of Lading (Hague-Visby Rules), transport by air (Warsaw Convention and related conventions), transport by rail (C.O.T.I.F. Convention) and inland navigation. A special chapter is devoted to Multimodal Transport. Finally, European Union competition law in the field of transport is discussed. International monographs address marine pollution, salvage, the Hamburg rules, the UN Convention on Multimodal Transport, the Limitation of Liability for Maritime Claims (the L.L.M.C. 1976 Convention), and the roles of the International Maritime Organization (I.M.O.), the Comiti Maritime International (C.M.I.), and BIMCO. Each monograph follows the outline below. The Authors Table of Contents List of Abbreviations Preface General Introduction Selected Bibliography Part I: Introduction 1. Definitions and Notions 2.
