**Marek Zirk-Sadowski, Bartosz Wojciechowski : Towards Recognition of Minority Groups: Legal and Communication Strategies (Law, Language and Communication)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Towards Recognition of Minority Groups: Legal and Communication Strategies (Law, Language and Communication):

This volume analyses current debates concerning problems in the nature, justification, and legal protection of human rights for minorities, with reference to the issues surrounding social milieu as a source of any legitimized law, which is in itself in need of legal recognition as well as being an object of legal protection. With contributions from a global network of scientists across several continents, the work examines the debate dedicated to the understanding of the normative framework, expressed in terms of human rights that guarantee autonomous action in public and private for minority groups as well as individuals. The chapters go on to study the particular claims that need to be audible and visible for others in the public sphere with reference to the legal protection of human rights. The work concludes with the completion of an interpretative circle debating the issues of legal consensus and legal identity with respect to the specificity of the patterns and modes guiding human interactions. Going beyond the legal analysis to discuss communication strategies in human rights, this collection will be of great interest to those studying the philosophy and theory of law, practical philosophy in general, political sciences and theory of democracy.

'Edited by leading voices in Poland's academy, this volume consists of an impressive array of contributions on the always-current question of groups' rights in liberal democracies, encompassing perspectives from both continental and analytical philosophy.'. Ofer Raban, University of Oregon School of Law, USA 'This book offers a comprehensive and critical overview of human rights and the fights for recognition in the sphere of the law. The book fills a gap in the literature of human and minority rights, and is based on concrete legal situations and cases. The work will be of interest to scholars, students and activists concerned with these topics.' --Antal Visegrady, University of Pecs, Hungary  
About the Author  
Marek Zirk-Sadowski is Professor of the Theory and Philosophy of Law at the University of d, Poland.
