Robin Craig, Michael Green, Andrew Klein, Joseph Sanders : Toxic and Environmental Torts: Cases and Materials (American Casebook Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Toxic and Environmental Torts: Cases and Materials (American Casebook Series):

0 of 0 people found the following review helpful. This book is terrible.By cheesecake travelerThis is a terrible book. It's confusing, poorly written, and lacks a cohesive theme.

Craig, Green, Klein and Sanders' Toxic and Environmental Torts: Cases and Materials provides an integrated approach

to private and public law responses to toxic insults to individuals and to the environment. Rather than focus on procedural issues, it comprehensively examines the substance of toxic torts and explores, among other issues, the difficulties of employing various scientific methods to address the difficult question of causation. It also considers the role of public law, both in controlling risks and in its interaction with private law.
