We have progressed in nearly every area of our human existence; except we seem to have forgotten or lost the true meaning of our countries creation -- freedom. Our nation was founded on the concept of individual freedom, where the individual was sovereign and the government was the servant. With individual freedom came individual responsibility. One of those responsibilities was to control errant government actions and the courage to hold the government accountable when they stepped beyond their enumerated powers. For without checks and balances of that power, well meaning men will seek to enlarge power in an effort to protect our freedoms. But, as the scales of justice shows, in order to maintain a balance between

freedom and governance the roles of master and servant cannot change and still maintain balance. For once the government steps beyond its bounds the only power that can be taken is from the rights of the people. In an effort to help spark a renewed understanding of what we have lost "Unalienable Rights" discusses the following concepts: The federal government enforces laws outside the scope of federal jurisdiction. The federal welfare schemes are unconstitutional and are an affront to personal liberty. The federal government has usurped states' authority. The presidents have passed laws outside of their Constitutional powers. The Supreme Court has illegally acted as legislature. The financial structure in the United States today is unconstitutional. The Congress has unconstitutionally given away its responsibilities. The tax scheme is unconstitutional and illegally enforced. Americans have lived in a constant state of emergency since the civil war, giving dictatorial powers to the executive branch usurping rightful powers from congress. The demonization of America's militia. The usurping of the people's right to keep and bear arms. Why the government won't stop illegal immigration. Property and property rights have been stolen from all Americans. Excessive limitations on free speech. The curtailment and loss of many of your Fourth Amendment rights. The misapplication of emergency powers by the federal government. The missing common law. The missing rights of the citizens. The fraud of the Sixteenth Amendment by all branches of government. Unlike other authors, Mr. Lemieux speaks as a PATRIOT, without a political agenda. His words are a warning to a nation that sleeps as their rights are being taken from them, quietly but methodically. If you think that Americans are a free people, I strongly suggest that you buy this book and I promise, you will be enlightened! 1 of 1 people found the following review helpful. Must Have In YOUR Library!!! By Customer This book will open your eyes to the vast tyranny that we have been conditioned over time to accept and allow to continue in this great country of ours. He exposes and backs up with fact how our rights are being eroded away and how we, over time, have just come to accept it as being true, when that couldn't be further from the truth. Mr. LeMieux has nailed it perfectly in this book. I have been a study of the Constitution for a few years and there was stuff in here that he touched on that I either didn't know or didn't know enough of the rest of the story behind it. I believe that this book makes a great case for and upholds the right of the people, through being educated first, to fulfill their duty to a second American revolution and to restore this country back to the way it was supposed to be a legal and Constitutional Republic, instead of the power usurping, socialist democracy everyone thinks it is supposed to be. The Constitution is clear, and LeMieux has definitely done his homework on this one. If it doesn't enrage you to the point of going postal, it will at the very least make you stop and think about what we have allowed to happen to us! Stop being another one of the sheep and open your eyes...you will not regret this book. 2 of 2 people found the following review helpful. Every American should read this book!! By M. R. Borelli Great book. Very detailed. This book is a must read for all Americans concerned about where this country is going and what we can do about it. Every page is well written and well researched. Definitely opened up my eyes to what has been going on for years in Washington. More and more the politicians are forgetting or not caring about the Constitution when they make all these laws. This book outlines how and why they do it in terms most of us will fully understand and grasp. This is not a book bashing the left or praising the right. It is a book written for the sole purpose of educating the people of this country of the wool over our eyes that our elected officials have put over us years ago and are continuing to pull over us to this very day.

The America of our forefathers, the ideals of liberty established in a republic protected by a constitution and government, does not exist today. We have progressed in nearly every area of our human existence, except we seem to have forgotten or lost the true meaning of our country's freedom. In an effort to help spark a renewed understanding of what we have lost, this book discusses the following concepts: Federal jurisdiction. Federal welfare schemes. Federal citizenship. Presidential decrees. Judicial legislation. Federal monetary failure. Unconstitutional tax enforcement. Unconstitutional emergency powers acts. The demonization of America's militia. Usurping the people's right to keep and bear arms. Why the government won't stop illegal immigration. Property rights stolen from all Americans. Excessive limitations on free speech. Curtailment of your Fourth Amendment rights. Misapplication of emergency powers. The missing common law. The missing rights of the citizens. The fraud of the Sixteenth Amendment.
