No American living in 1800 would have predicted that Thomas Jefferson's idiosyncratic views on church and state would ever eclipse those of George Washington, let alone become constitutional dogma. Yet today's Supreme Court guards no doctrine more fiercely than Jefferson's antagonistic wall of separation between church and state. Washington's sharply contrasting views, explored in this path-breaking book, suggest a more reasonable interpretation of the First Amendment, one that is consistent with religion's importance to the enterprise of democracy.

Ross and Smith restore George Washington's view of church and state to its proper place in history, which will inevitably change what we think and say in the present. Hint: He and Thomas Jefferson didn't see eye to eye. --Richard Brookhiser, Author, *What Would the Founders Do?* and *Founding Father: Rediscovering George Washington* Ross and Smith's study of Washington illuminates the question of church and state in America in remarkable ways. They have written a truly enlightening and thought-provoking book. --William Kristol, Editor, *The Weekly Standard Under God* examines a subject that has long deserved careful attention. This book is a must-read for every patriotic citizen. --Edwin Meese, Former US Attorney General About the Author Tara Ross, the author of *Enlightened Democracy: The Case for the Electoral College* (2004), is a graduate of Rice University and the University of Texas School of Law.
