From Brand: Hart Publishing : Values in Global Administrative Law before purchasing it in order to gauge whether or not it would be worth my time, and all praised Values in Global Administrative Law:

Global administrative law has recently emerged as one of the most important contemporary fields in public law scholarship. Concerned with developing fuller understandings of patterns in global governance, it represents one of the

most insightful ways of viewing the multifarious forms of public power that now exist beyond the State. Focusing in particular on the search for accountability and legitimacy, it carries with it: testing questions about democracy in post-Westphalian society; the meaning of ideas of "publicness" and "public good;" and the global relevance of values that include due process, equality, and fundamental rights. These, and other issues, are key to critiquing the form of governance that now envelops the globe. This collection of essays brings together leading public law scholars who are working in the field of global administrative law. Based on papers presented at a workshop held at Sciences-Po in Paris, it addresses past and future challenges related to global governance. Each of the contributions picks up on the more general theme of the values that do or should inform global administrative law. In this way, the book provides a novel and thought-provoking commentary on this most engaging area of debate. Values in Global Administrative Law will be of interest not just for public lawyers, but also for social and political scientists working on globalization and/or international relations. It will also be an invaluable resource for undergraduate and postgraduate courses that touch partly or exclusively on the challenges of global governance.

The book is very rich in thought-provoking contributions and a short review cannot hope to do justice to the variety of issues addressed. With its many voices, viewpoints, perspectives, and factual information, the book under review brings further the conversation on the future institutional framework of humankind (Roberto Caranta *Common Market Law*, Volume 49, 4). About the Author Gordon Anthony is Professor of Law at Queen's University, Belfast. Jean-Bernard Auby is Professor of Public Law at Sciences Po Paris, and Director of the Chair in "Changes in Governance and Public Law". John Morison is Professor of Jurisprudence at Queen's University, Belfast. Tom Zwart is Professor of Law at Utrecht School of Law and the Director of the Netherlands School of Human Rights Research.
