Andrea K. Bjorklund : Yearbook on International Investment Law Policy, 2013-2014 (Yearbook on International Investment Law and Policy) before purchasing it in order to gage whether or not it would be worth my time, and all praised Yearbook on International Investment Law Policy, 2013-2014 (Yearbook on International Investment Law and Policy):

International investment law today consists of a network of multifaceted, multilayered international treaties that, in one way or another, involve virtually every country of the world. The evolution of this network raises a host of issues regarding international investment law and policy, especially in the area of international investment disputes. The Yearbook on International Investment Law Policy 2013-2014 monitors current developments in international investment law and policy, focusing on recent trends and issues in foreign direct investment (FDI). With contributions by leading experts in the field, this title provides timely, authoritative information on FDI that can be used by a wide audience, including practitioners, academics, researchers, and policy makers. The 2013-2014 Yearbook begins with trends in international investment and the activities of multinational enterprises, a review of trends and new approaches in international investment agreements for 2013-2014, and a review of international investment law and arbitration for 2013. This edition contains a sample of the research and ideas generated by the Investment Treaty Forum at the British Institute of International and Comparative Law--The Investment Treaty Forum brings together experts in international investment law to engage in high-level debate about salient topics in investment law. This edition covers many important topics, such as the principle of proportionality and the problem of indeterminacy in international investment treaties; proportionality, reasonableness and standards of review in investment treaty arbitration; and the role of investors' legitimate expectations in defense of investment treaty claims. The general articles included in this volume provide analysis of balancing investor protection and regulatory freedom in international investment law. The jurisprudential interaction between ICSID tribunals and the International Court of Justice are also discussed, along with inconsistencies in investor-state awards, the role of state interpretations; old and new ways for host states to defend against investment arbitrations, and approaches and analogies in the countermeasures defense in investor-state disputes. This volume explores the political economy of crises and the international law of necessity after the great recession. In addition to this are articles on unilateral treaty-making and bilateral investment treaties; investment promotion, agencies; the trend toward open contracting; and new regulations on foreign acquisitions of land in Brazil and Argentina. This volume concludes with the winning memorials from the 2013 FDI International Moot Competition.
